Assignment!!

Write a report (up to A4 2 pages, in either English or Japanese) of either (1) or (2) below:

1) Read any recent paper (published in a high impact journal) about germline or small interfering RNA, and make a summary report.

2) Propose a research project using Drosophila melanogaster to address
   - Germline biology
   - Gene silencing, Transposon
   - Any human disease

Send your report to:

seimei-daigakuin@office.osaka-u.ac.jp

【Deadline: 18th June, 2019, 5 p.m.】

I strongly encourage checking your report for any plagiarism.
Any suspicious one will be checked by iThenticate.
