

Organized by Laboratory of Human Evolution and Functional Genomics,  
Graduate School of Frontier Biosciences (FBS), The University of Osaka

# *Stem Cell Biology Special Lecture*

## Date & Time

2026

**7/29**

**WED**

**10:00-12:15**

## Venue

**Main Hall, 1st Floor  
CiDER Building  
The University of Osaka**

\*No need for pre-registration

## Program

10:00~11:00

**Impacts of genetic risk factors for schizophrenia and genetic backgrounds on human iPSC-derived hippocampal neurons**

**Dr. Guo-li Ming**

Perelman School of Medicine,  
Department of Neuroscience Institute for Regenerative Medicine,  
University of Pennsylvania

~Break (15 min)~

11:15~12:15

**Epitranscriptomic regulation in the mammalian nervous system**

**Dr. Hongjun Song**

Perelman School of Medicine,  
Department of Neuroscience Institute for Regenerative Medicine,  
University of Pennsylvania

Sponsored by VERITAS and Nikon

Supported by Graduate School of Frontier Biosciences (FBS), The University of Osaka

Organizer : Ikuo Suzuki<sup>1</sup> and Hiroko Shimada<sup>2</sup>

1. Graduate School of Frontier Biosciences (FBS), The University of Osaka

2. Keio Frontier Research & Education Collaborative Square at Tonomachi, Keio University
